## DETAILED ACTION

### ***Request for Continued Examination***

1. The request filed on 4/1/04 for a Request for Continued Examination (RCE) under 37 CFR 1.114 based on parent Application No. 09/416,331 is acceptable and a RCE has been established. An action on the RCE follows.

### ***Response to Amendment***

2. As per Applicant's instructions in Paper 19 as filed on 4/1/04, claims 1, 12, 17, 27, 40, 47 have been amended, and claims 51-58 have been newly added.

### ***Response to Remarks***

3. Applicants' remarks with respect to amended claims as above have been considered. However, the Applicants' arguments are moot in view of the election/restriction.

### ***Election/Restrictions***

4. This application contains amended claims directed to the following patentably distinct species of the claimed invention:

**Species I:** Fig. 3, surveillance and monitoring environment storing image data at an off-site storage location.

**Species II:** Fig. 4, network and surveillance elements existing at a client site.

**Species III:** Fig. 5, applications that reside on a server component at an off-site storage location.

**Species IV:** Fig. 6, applications that reside on a client component.

**Species V:** Fig. 7, flowchart, event driven image acquisition process.

**Species VI:** Fig. 8, flowchart, transmission and storage of image data at an off-site storage facility.

**Species VII:** Figs. 9A-9C, GUI that enables the acquisition and display of archived video image data.

**Species VIII:** Figs. 10A-10C, GUI that enables the viewing and interactive control over live video image data.

**Species IX:** Fig. 11, flowchart, producing live video images.

**Species X:** Fig. 12, flowchart, storing video image records into an image database.

**Species XI:** Fig. 13, flowchart, controlling a surveillance camera from a location remote from a client site.

Applicant is required under **35 U.S.C. 121** to elect a single disclosed **species** on the basis of the corresponding figures listed above, and to indicate to the Examiner which of the claims 1-58, read on the elected figure of the disclosed **species** for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is considered generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the Examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
